

SMW Up- & Down Converters

Small and Light units

The main applications are local TV distributions, internet and small power links.

SMW's Up Converter covers the frequency range 9.8 - 10.0 GHz and the Down Converters are available within the frequency range 9.0 - 10.7 GHz with different LOs depending on model.

All our LNBS are individually hand tuned to get the very best performance available for each unit. Quality and long term reliability is also essential. Therefore all LNBS are tested according to a very extensive test program, which includes heating, cooling, water-proof testing and rigorous electrical testing.

Swedish Microwave was founded 1986 and, within Europe, is the oldest manufacturer of LNBS. In the standard product range we have DRO-LNBS, PLL-LNBS, LNAs, Block Downconverters (BDC), Up- & Down Converters, Quattro LNBS, Twin LNBS, Ortho mode transducers (OMT), Line Amplifiers and Feed horns.

Swedish Microwave is today one of the leading manufacturers of microwave components needed for satellite receiving equipment and other industrial products.
